Scattering N. (San-Shin) for
dispersion, during the local tx. or
end of treatment.

HOW TO FIND EXCESS POINT

❖ **Volcano Point/w jaki shows a resistance.**

- **Feels drier and tighter like a rough wall. It shows as jaki invasion on/above and under the point.**
- **Depth of Touch needling is deeper than the tonification.**

JAKI INVASION

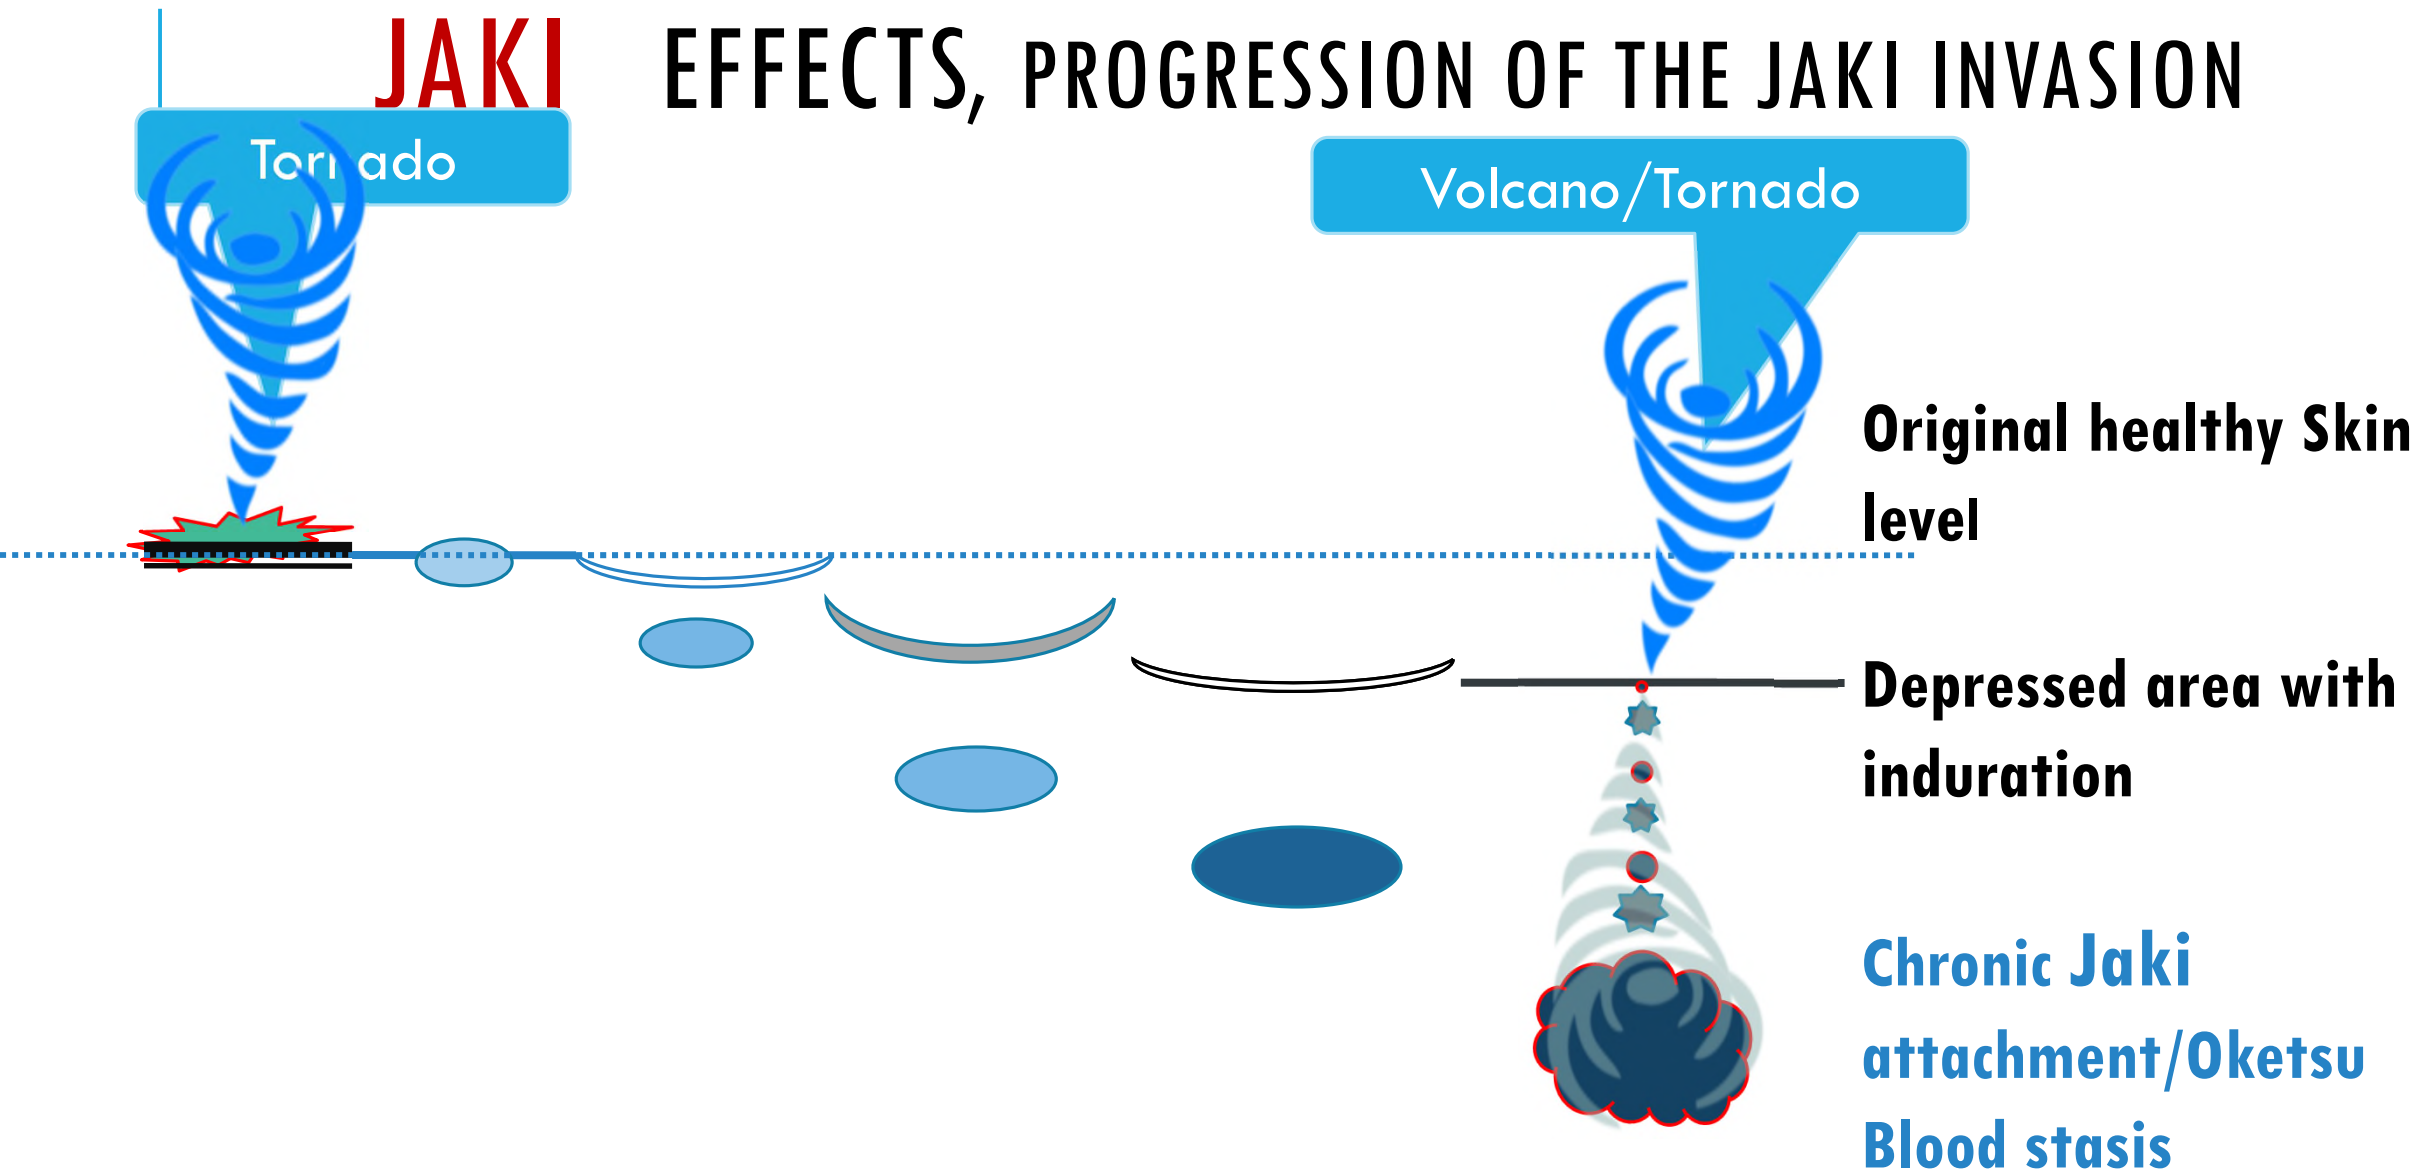

JAKI

EFFECTS, PROGRESSION OF THE JAKI INVASION

Tornado

Volcano/Tornado

Original healthy Skin level

Depressed area with induration

Chronic Jaki attachment/Oketsu Blood stasis

FIND THE REACTIONS:

I. Kyoro

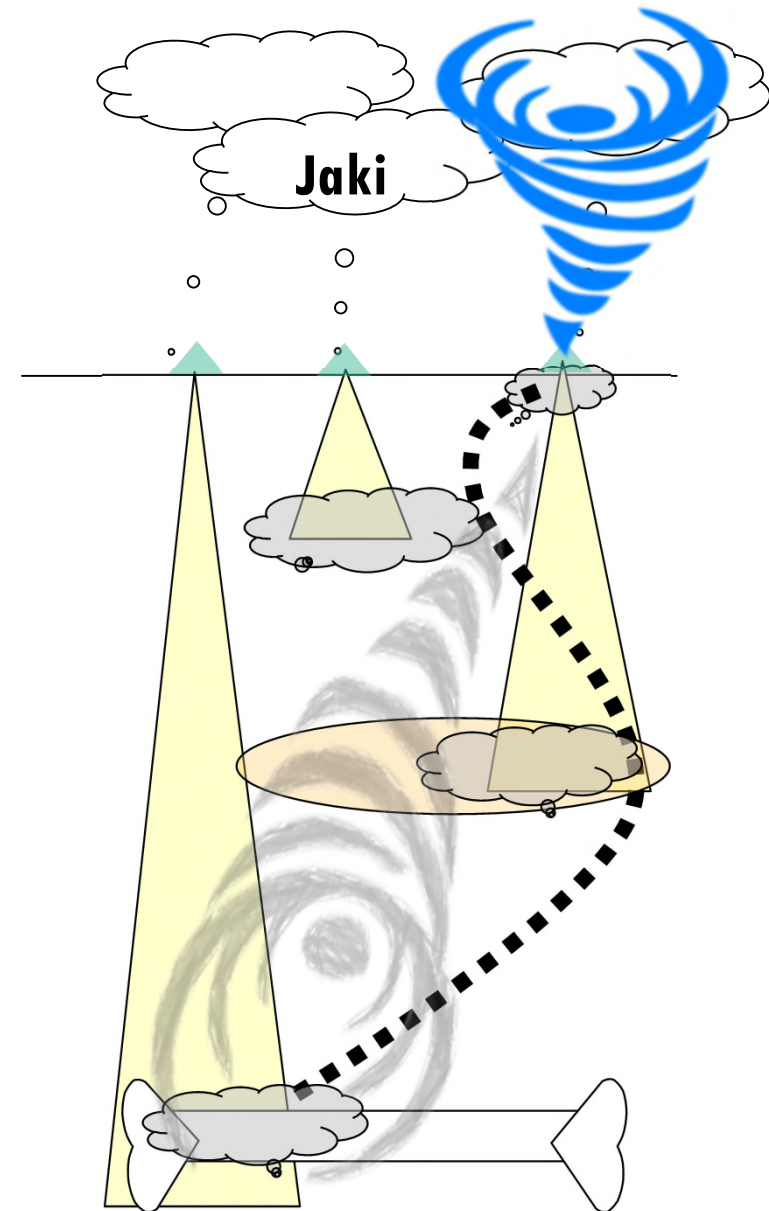

lack of the **luster** at the surface of the skin. Soft or hard induration in/of the dermas.

induration/hardness in/of the muscles.

III. Withered bone

below the muscle and above the bone.
induration/hardness on/of the bone.

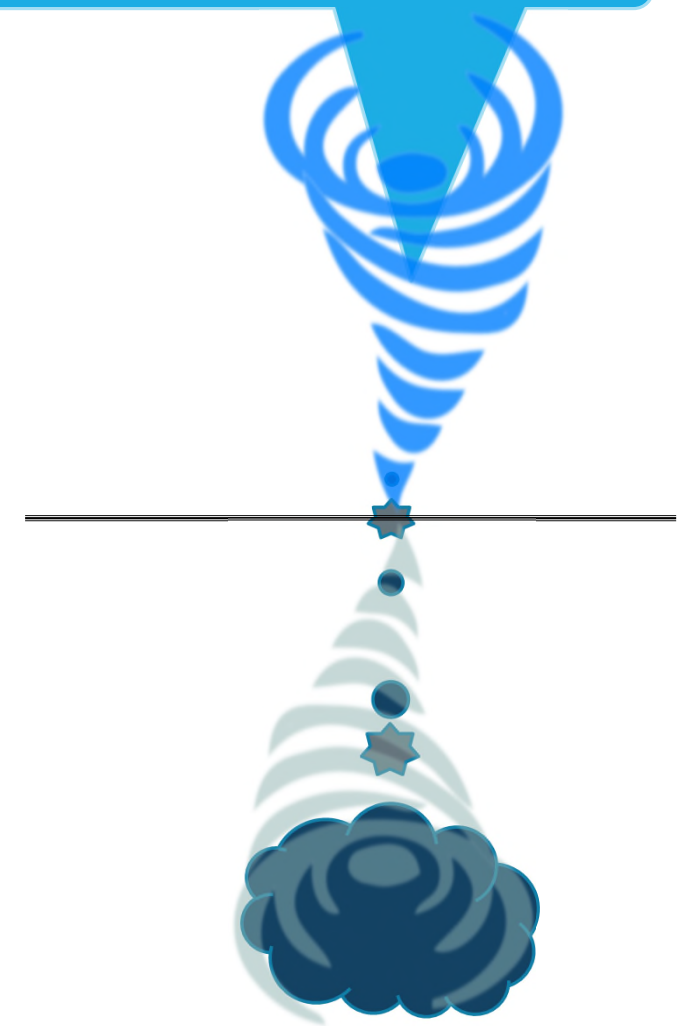

* **LOCAL TX.**
w/VOLCANO TX.

Volcano, live-point has a kind of connection to **Jaki**. It likes an old thread w/touch and Hesitated pulse.

It can be helped by twisting, flicking types of Goshin needling or methods that is corresponding to their skin conditions.

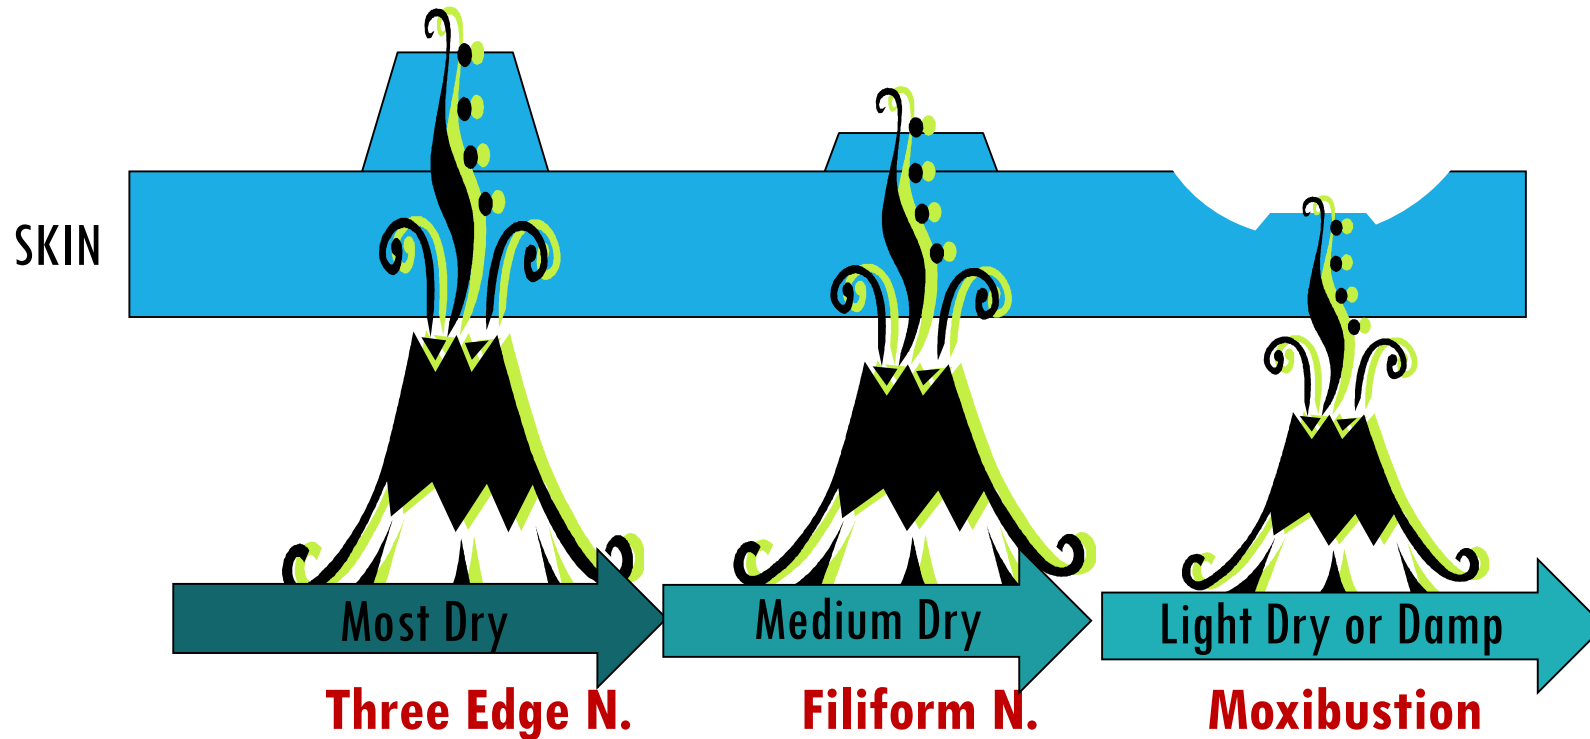

Volcano/Tornado

THREE TYPES TX. METHODS FOR VOLCANO :

Dryness
Protuberances
Roughness
Thickness

Dampness
Depressions
Flaccid
Floating and dry grass island in the lake

Volcano, live-point

* LOCAL TX.

w/VOLCANO TX.

STEPS: 0. 4.
5.

	Level of Water	Surface	Thickness of the skin
1) Sanryo Shin	Dry	Convex	Thick, hard, rough
2) Go Shin	Med-level	or mix	
3) Chokusetsu -Kyu	Dampness, wet	Concaved, depressed, soft, flaccid	Thin, with water retention
