

Shonihari

Week 10 (8) 3/24

Theory and practice of Supplementary Treatment Systems: EV tx., Shigo tx. as “home treatment”

How to relate to the child. Methods to stop their crying.

- ◆ Practice root and local treatment with Taishi-hari, Jaku-san, Teishin and EV, Shigo

TIPS FOR SHONIHARI

Oriental Magic

Shonihari is Oriental magic that puts children back on their feet, making smiley faces, peaceful sleepers & hungry munchers.

With Shonihari children light up with treatments that are pleasant, and become full of life in a matter of minutes. With Shonihari children can say bye-bye to sickness, and families can beam with joy together. Shonihari is a preventive medical treatment that is enjoyed by children and puts a smile on their faces.

Masanori Tanioka

Education of the guardian Praise for the child

*** To agree and sympathize with their parents' appeal.

1. To understand the suffering of parents.
2. Explain the progress and prospect of sickness and symptom.
3. To let them understand the plan and treatment.

*** Please ask questions in return, if you find it difficult to answer their questions.

Parents may ask you some questions which might have no answer (or very difficult to answer) in many cases.

“I don't know...” could be one decision of answer, though ask some related questions may lead to find the answers in some cases.

Suggested to complement and admire the child in the presence of the guardian. This will gain their attention, and then you can more easily tell them whatever important matters they need to hear.

「Essence and Practice of Shoni Hari」

1. To come in contact with a gentle face.
 2. To touch a child's skin as feather touch.
 3. To imitate an animal sound (voice).
 4. To find a way to have those children naturally follow you rather than you chase them.
 5. To be able to follow the speed and movement of kid's mind.
- ◎ Children are very impatient, and also easily change their minds.
 - ◎ They are interested in moving objects and love to touch them.
 - ◎ They are curious, very active and never keep still.
 - ◎ To handle children according to each circumstance, physical power and a flexible mind are necessary.

Supplementary Treatment

Extra Ordinary Vessel Tx. as Home therapy

Use magnet, and how to use magnetic tester?

The magnet used for EVs is 800 gauss in strength. The one side of the magnet has a small projection, and the other side has flat surface. The protruded side is positive, and the flat side is negative in polarity.

After determining which EV tx. pattern (SHO) to use, place the positive side on the master point, and the negative side on the coupled point.

Then, **check the pulse**, the main symptom, and if any tension of the neck and shoulder improved,

When you find the best EV sho, mark the points. Then retain the magnets on each point about 15 minutes. Suggest to them this method as their home therapy. They apply it one or two times a day.

Additional Super 4

EV tx. is done by using the corresponding 8 master/coupled points; these points all belong to the twelve regular meridians. In addition to the original EV patterns, we use 4 additional patterns:

(1) LR3--HT5 (2) LI4--ST43

thus four additional meridians not normally used in EV tx are utilized.

Shigo Treatment

Its uses in Shonihari are very simple. If Evil Ki effects a specific meridian and/or it shows up at a specific time of day, it becomes an active excess (stagnation) of Ki, which disturbs homeostasis. It may also be manifested as deficiency on its paired meridian. As a result, problems can occur.

Treatment Key Points

- 1 - Use the horary clock system and treat the opposite meridian based on symptomology or time.
- 2 - For Organ problems or bilateral pain, use more active deficient type pain point.
- 3 - In assessing the meridian, first check the Luo Pts. or Xi-Cleft Pts. for deficient type of pressure pain, or use other command points based on the diagnosis.
- 4 - Use gold pressballs to treat. Retain on the point a few days (1-3 days). To retain longer, replace the balls on the same point after a few days to avoid irritating the skin.

GB11-1am HT11-1pm
LU3-5am BL3-5pm
ST7-9am PC 7-9pm

LR1-3am SI 1-3pm.
LI 5-7am KD5-7pm
SP9-11am TW9-1 pm

Have More to Say?

Again, it is smile and gentle face.

Most effective point for Ac-tx. is Volcano point.

It feels like a “dry-old-towel” for regular needle or 3 edge needle and “Floating-Dry-Bush-Island on the pond” for moxibustion.

And it is to make the treatment short and be a friend to the child.
