

How to use Jaku-san (non-insertive Sanryoshin for baby's blood stasis)

How to relate to the child. Methods to stop their crying.

Advising parents regarding suggestions:

How to approach children, short overview of advised diets?

TIPS FOR SHONIHARI

*Because,

Primary sense of children is instinct and Genius.

To come in contact with gentle face.

- If children cry, then try to take care on a case by case basis.
- Never show the Doc.'s sharp tools.

Try communicate well with children's world.

- Pain, Fear, Cry, Needle are "Taboo Words"
- The moment of inhalation is when the child can hear your voice

To imitate an animal sound (voice).

- Attract the children into the table with toys and sounds.

Try to speak according to their ages.

- Specific topics may help your conversation. TV programs, Characters, Hobbies.

To find a way to have those children naturally follow you rather than you chase them.

Children may follow you if you attract their mind.

<SECRET> TECHNIQUE

If children feel comfortable and happy, surely their parents also may feel happy at that time.

When treating the stiffest part of the body or you feel "this treatment is working now",

Suddenly ask to them "How do you feel?"

Try to let children say "It is comfortable! (or Good!)"
(To draw out this word is very important)

How to read the surface of the body?

Three level of improvable skin condition:

1. **Jakusan;** More dry, hard = Blood stasis
2. **Taishi needle;** Medium = Ki stagnation
3. **Moxa or warming technique;**
Less dryness and wet around point softer dry towel
= Deficient type blood/water *Jaki*

How to use Jakusan

After treat their coarse area with Taishi needle,

You may find rough points still there. Then, you think to use Jakusan.

- A. Hold needle through window that opened lower side of the needle with index and thumb.
- B. Top of the needle and tube is controlled by side of index finger.
- C. Place the needle on the point about right angle.
- D. Hit the top of needle with other hand's index.
- E. Adjust the depth and strength of tap to the level of skin condition.
- F. **The rhythm of hand:** during manipulation is 150 times/min.

Education of the Guardian

There are differences between pediatric and adult tx.

It is not possible for a child to come to the clinic alone.

It is suggested to complement and admire the child in the presence of the guardian. This will gain their attention, and then you can more easily tell them whatever important matters they need to hear. Finally, their parents may understand the importance of Hari therapy.

Diets

Sugary foods __ Dependence, sweet kid with spoiled and cranky

Fatty foods (cheese, etc) __ Genius with little spiteful, nightmares

Refined Salt __ Bossy crazy (junk) friend.

From the beginning baby has a lot of salt in their body which come from mother blood. Don't replace it with Refined Salt.

Junk foods (General fast foods) __ Combination of three powerful or week poison: **Sugar+Fat and refined Salt**

Have More to Say?

Finish the treatment with smile so children feel good and want to come again! Next time Children brings their family to the clinic.
